

Application No. 10/731,209
Fred Stanley Filed: December 9, 2003
GAU 3811

illustration of one embodiment of the invention. The Detailed Description of Invention states:

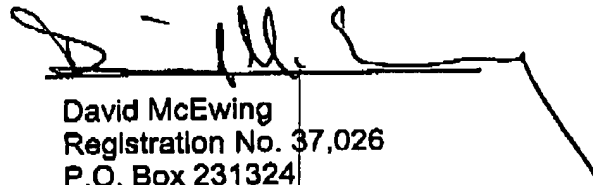

"Figure 7 illustrates an overhead view of a decorative coordinated mat system comprised of two mats 300 350 *again* having separate designs but that are coordinated into a composite composition having an intended *motif* or *theme*. The theme can be coordinated with either the interior area 402 or exterior area 401 or both. The relationship of each mat to the entranceway 200 connecting the interior and exterior floor areas is also illustrated."
(Emphasis supplied)

The Applicant identifies claims 1, 2, 3, 4, 5, 6, and 7.

REMARKS

Response addresses all requirements of MPEP §809, including all claims readable on the elected species. The application is now ready for the first action on the merits and such action is respectfully requested.

Submitted this 14 day of June 2005,
